

# Beacon Of Light

- Teddy Atlas

There is a darkness that one walks into when knowing there is risk and uncertainty waiting for you. But there is also a certain light that can be found through the dark. An understanding that comes from having gone to the inner caves of oneself and discovering what is there. That journey can create a path that can lead to new and greater places that would not have been possible before.

The courage it took to walk into this place allows you to now leave with a lantern of knowledge and awareness that will forever provide a beacon of light wherever you go and lead you to again be the champion of the world.

Things I need to overcome (darkness) ...
