ANIMALS

Read the sentences about animals and fill in the gaps with words from the box.

tasting purr total Platypuses hearts forget to freeze
poop water bears penguins names memories pebbles trees

- 1 Elephants have incredible memories and never forget
- 2 Frogs are able freeze during winter and then thaw in the spring.
- 3 Octopuses are unique and have three hearts
- 4 Humans propose with a ring but penguins give some pebbles
- 5 Cheetahs don't roar, to communicate they purr
- 6 Sharks are much older than even trees , 400 million years old!
- 7 Sloths are very slow. Sloths poop only once a week.
- 8 The feet of butterflies have special sensors for tasting
- 9 Giraffes don't sleep much. They only sleep in total 2 hours a day.
- 10 Dolphins are smart and they also have names which they whistle.
- 11 Platypuses hunt by sensing the electrical signals given off by animals.
- 12 Tardigrades, also known as water bears are tiny creatures that can survive without food for years, even in outer space.

12 ANIMAL FACTS

Fact #1: Elephants Never Forget

"Did you know that elephants have incredible memories? Their brain, especially the part responsible for memory, is highly developed. This helps them recognize friends and family even after years apart!"

Fact #2: Frogs Can Freeze and Still Live!

"Some frogs, like the wood frog, have an amazing ability to freeze during the winter and thaw out alive in the spring. They don't even need to breathe while frozen—how cool is that?"

Fact #3: Octopuses Have Three Hearts

"Yes, you heard that right! Octopuses have not one, not two, but three hearts. Two pump blood to the gills, and one pumps it to the rest of the body. They truly wear their hearts... everywhere!"

Fact #4: Penguins Propose with Pebbles

"When a male penguin falls in love, he presents the female with a pebble as a proposal gift. If she accepts, they become a lifelong couple. Who knew pebbles could be so romantic?"

Fact #5: Cheetahs Don't Roar, They Purr

"While big cats like lions roar to communicate, cheetahs do something completely different—they purr just like house cats when they're content! They also chirp to get attention."

Fact #6: Sharks Have Been Around Longer Than Trees

"Sharks are ancient creatures! They've been swimming in the oceans for over 400 million years, which means they've been around longer than trees. Talk about survivors of evolution!"

Fact #7: Sloths Only Poop Once a Week

"Sloths are famously slow, and even their bathroom breaks are lazy. They only come down from trees to poop once a week. It's quite an event for them!"

Fact #8: Butterflies Taste with Their Feet

"Imagine tasting your food with your feet! Well, that's exactly how butterflies do it. Their feet have special sensors to help them detect the taste of nectar when they land on flowers."

Fact #9: Giraffes Sleep Less Than Two Hours a Day

"Giraffes are busy animals! They only sleep about 30 minutes at a time, for a total of less than two hours a day. With those long necks, who needs a long nap?"

Fact #10: Dolphins Have Names for Each Other

"Dolphins are super smart! They have specific whistles that work like names, allowing them to call out to one another individually. It's like a dolphin version of calling someone by their first name."

Fact #11: The Platypus Can Sense Electricity

"The platypus is one of the strangest animals on Earth! Not only do they lay eggs, but they can also sense the electrical signals given off by other animals in the water, helping them hunt even in the dark."

Fact #12: Tardigrades Can Survive in Space

"Tardigrades, also known as water bears, are tiny creatures that can survive extreme conditions, including outer space! They can go without food or water for decades and still come back to life."

1. Question: Which is the slowest animal on Earth?

Answer: Three-toed Sloth

2. Question: How many noses does a slug have?

Answer: Four

3. Question: Which animal, also considered the largest land mammal in the world, cannot jump?

Answer: Elephants

4. Question: Which is the tallest animal?

Answer: Giraffe

5. Question: Which bird is considered to be the largest bird in the world?

Answer: Ostrich

6. Question: Which aquatic mammal in the world has the most extended lifespan?

Answer: Bowhead Whale

7. Question: Which is the largest mammal in the ocean?

Answer: Blue whale

8. Question: Which animal is considered the fastest animal on Earth?

Answer: Cheetah

9. Question: Dove is considered to be the symbol of ____.

Answer: Peace

10. Question: What is a female deer called?

Answer: Doe

11. Question: Which is the smallest bird in the world?

Answer: Bee Hummingbird

12. Question: How many legs does a spider have?

Answer: 8

13. Question: Which aquatic animal is the most poisonous one in the world?

Answer: Pufferfish

14. Question: Which animal has the most extended tail?

Answer: Giraffe

15. Question: Which bird is considered the fastest bird?

Answer: Peregrine Falcon

16. Question: How many eyes does a shrimp have?

Answer: 12-16

17. Question: What kind of animal is a Dolphin?

Answer: Mammal

18. Question: How heavy is a brown bear?

Answer: 550 pounds

19. Question: How many wings does a fly have?

Answer: One pair

20. Question: What is a group of hedgehogs known as?

Answer: Pickle

21. Question: Where is a shrimp's heart located?

Answer: In its head

22. Question: Which animal runs in a zig-zag manner to escape its predator?

Answer: Hartebeest

23. Question: What is a baby Puffin called?

Answer: Puffling

24. Question: How long is a leopard's tail?

Answer: Almost as long as its body

25. Question: Which animal has three hearts?

Answer: Octopus

26. Question: Which animal has the highest blood pressure?

Answer: Giraffe

27. Question: How many legs does a worker honeybee have?

Answer: 6

28. Question: What part of a rodent never stops growing until it dies?

Answer: Teeth

29. Question: What is a group of Elephants called?

Answer: A parade

30. Question: What is the color of a giraffe's tongue?

Answer: Black

31. Question: Wrinkles on a Gorilla's nose is similar to what part of the human body?

Answer: Fingerprints.

32. Question: How long is a chameleon's tongue?

Answer: As long as its body

33. Question: How many heart chambers does a cockroach have?

Answer: 12

34. Question: Which animal does not drink water and survives on metabolism?

Answer: Kangaroo rat

35. Question: Which mammal lays eggs?

Answer: Platypus

36. Question: Giraffes don't have _____.

Answer: Vocal cords

37. Question: How far can Peregrine falcon see?

Answer: A mile away

38. Question: Which animal does not sleep?

Answer: Bullfrog

39. Question: What is a Rhinoceros horn made up of?

Answer: Hair (Keratin)

40. Question: Which big cat has the loudest roar out of all the big cats?

Answer: Lion

41. Question: How long can Emperor Penguins stay underwater?

Answer: 27 minutes

42. Question: What is the color of a Polar Bear's hair?

Answer: It does not have any color. It is hollow and reflects the light.

43. Question: How many times does a hummingbird flap its wings to hover?

Answer: 200 times per second

44. Question: Belgian blue is a breed of which animal?

Answer: Cow

45. Question: Where are a Kiwi's nostrils?

Answer: At the end of the beak

46. Question: Which bird consumes only bones?

Answer: Bearded Eagle

47. Question: A Grebe cannot _____.

Answer: Walk

48. Question: Which animal dies after giving birth?

Answer: Octopus

49. Question: Which shrimp has the fastest punch?

Answer: Mantis Shrimp

50. Question: What do sea otters do when they sleep in water?

Answer: They hold hands

51. Question: Which fish are born as males?

Answer: Clownfish

52. Question: Which amphibian can regenerate its limbs?

Answer: Axolotl

53. Question: A Grizzly Bear's bite is enough to crush a _____.

Answer: Bowling ball

54. Question: Which animal looks like a small deer but has fangs?

Answer: Chevrotain

55. Question: What do Humpback whales use to prey?

Answer: Bubbles

56. Question: Which primate is the only venomous primate in the world?

Answer: Slow lorises

57. Question: A male horse has more _____ when compared to a female horse.

Answer: Teeth

58. Question: Which mammal can truly fly?

Answer: Bat

59. Question: Which insect is known for changing its color?

Answer: Golden tortoise beetle

60. Question: How do octopuses taste?

Answer: With their tentacles

61. Question: Where do dogs have their sweat glands?

Answer: Paws.

62. Question: What is the oldest known breed of dog?

Answer: Saluki dogs

63. Question: Cats cannot taste sugar. Truth or false?

Answer: True.

64. Question: Snakes do not have eyelids. True or false?

Answer: True

65. Question: How sensitive are geckos' eyes?

Answer: 300 times more sensitive than human eyes

66. Question: What percent of bones are in a cat's tail?

Answer: 10%

67. Question: Are guinea pigs related to pigs?

Answer: No, they are rodents.

68. Question: Snakes have a flexible ____.

Answer: Jaw

69. Question: Which is the only breed of dog that cannot bark?

Answer: Basenji

70. Question: Komodo dragon is the largest reptile in the world. True or false?

Answer: True

71. Question: What breed of cat is the cat 'Garfield'?

Answer: Orange Persian

72. Question: How many teeth does an adult dog have?

Answer: 42

73. Question: What breed of dog is also known as 'Sausage dog'?

Answer: Dachshund

74. Question: How many feathers does a budgie have?

Answer: Up to 3000 feathers

75. Question: All parrots are herbivores. True or false?

Answer: False
